CHARTER

24th October 2009

The Institute of Mathematics has been created in collaboration with the Structure Semiotics Research Group S.E.R.R. Eurouniversity, Tallinn, to support the advancement of mathematical knowledge and its applications and to promote and enhance mathematical culture in India and around the world.

The goals of the Institute of Mathematics are to expand the frontiers of mathematical knowledge through focused research projects and to act as custodians of the copyrights and patents, where applicable, for the research accomplishments of its members.

The members of the Institute of Mathematics have come together through shared research interests and will continue the dissemination of mathematical knowledge by publishing papers and books, organizing seminars and providing online lectures for the public benefit.

Ashay Dharwadker
